

Water & Wastewater Treatment Process

Large firm experience condensed in a small
partnership for responsiveness and commitment

Services

Our extensive engineering services cover all aspects of water and wastewater treatment processes, nearly every type of unit process in operation today. Our experience in both the municipal and industrial water and wastewater treatment market equipped us with the versatility to provide you with dependable and creative solutions to your project needs.

Services for Industries & Municipalities:

- Front-End Engineering Design (FEED)
- Condition Assessment
- Conceptual, Preliminary & Final Design
- Process Peer Review & Value Engineering
- Project & Construction Management
- Hydraulic Modelling
- Process Modelling Simulation
- Treatment Process Operational Troubleshooting
- Permit/Approval Application Assistance
- Treatment Capacity Evaluation & Facility Re-rating
- Commissioning & Start-up Support

Services for Contractors & Suppliers:

- P.Eng Certified Shop Drawing Review
- As-built & Record Drawing Development
- Alternations Design & Certification
- Commissioning Planning & Coordination
- Piping Stress Analysis
